

## **Article 6 Negative Express Statement**

Effective Date: 19-06-2024

### **No Consideration of Sustainability Risks**

Currently, Fund I ('The Fund') does not consider sustainability risks throughout its investment decision-making process.

Lexar Partners has come to this conclusion for the following reasons:

1. The size of the portfolio companies and the fund are not proportionate to the administrative burden of considering sustainability risks.

Lexar Partners will take sustainability risks throughout its investment decision-making process into consideration in their new funds.

### **No Consideration of Sustainability Adverse Impacts**

Currently, Fund I does not consider Principle Adverse Impacts ('PAI' framework, also referred to as 'sustainability factors') in its investment decision-making.

Lexar Partners has made this decision for the following reasons:

Lexar Partners has on average less than 500 employee during the last financial year and given its size and the size of its portfolio companies, Lexar Partners considers it not proportionate – in terms of investment in time, costs and capacity and in light of the complexity involved with it – to provide the detailed information in accordance with Article 4(2) of the SFDR.

This decision was made on 19-06-2024 and Lexar Partners will annually reconsider this decision and the reasons behind it. In the meantime, Lexar Partners intends to undergo necessary preparations to align the internal procedures of its portfolio companies and ensure coherent data-gathering, with the view of ideally beginning disclosing its first PAI statement in the following years for new funds starting with only the relevant PAIs.
